

How to use PayPal

What is PayPal?

PayPal is an international Internet payment system for everyone with an email account. With PayPal you can safely pay online, in your own country or abroad, using your own bank account number or credit card. Your bank account or credit card will simply be linked to your PayPal account, so you can always pay everywhere.

Pay with PayPal

On our Internet site we offer the possibility to place your order and pay directly by using PayPal. The ordered books will be sent to you after your payment has been accepted. PayPal can be used in two different ways:

1. Directly by using the credit card option.
In that case you do not need to open an account but only need to provide your credit card details in order to settle your payments. See below.
2. By opening an account. In that case you leave your bank account details behind so that you will be able to settle future payments with one click. See below.

PayPal is safe

PayPal uses SSL technology to send encrypted information safely over the Internet. The recipient (in this case Jeroen van den Berg Consulting) will not receive any sensitive financial information such as your credit card or your bank account number. Only PayPal and the credit card company will see these details and keep this sensitive information behind heavily guarded doors. In this way you do not need to worry about payments to people or companies that you do not know.

What are the costs for requesting a PayPal account?

None. The use of PayPal is 100% free for buyers and no transaction fees or any other additional costs will be billed. Fees are only due in case you would open a Premier or Business Account. For payments at Jeroen van den Berg Consulting it is not necessary to open such accounts. A simple Personal Account at PayPal is sufficient! Further information about PayPal can be found on the PayPal Website.

What payment options does a PayPal account offer?

Payments can be made in the following ways:

- with your credit card or
- via your bank account

Payment with your CREDIT CARD

Paying with your credit card has a major advantage as your payment will be settled immediately.

Payment with your BANK ACCOUNT

Payment through your bank account is also possible, when you do not have a credit card or do not want to use it. When you want to pay by using your bank account at PayPal, you need a virtual bank account at PayPal which needs to be funded from your own bank account. You will need to commission your bank to remit funds to the newly opened PayPal account. This will take up to three or four working days. Once the amount has been transferred to your PayPal account, you can place the order and pay for it.
